1. START THE USER INTERFACE

- Connect the USB Hardware key or set the License Server address to connect to, in the "Advanced" menu (while all services are stopped)
- Run CARMEN[®]GO Control Panel
- Click on "Start" -
- Click on "Open Web Interface"-

- Default browser will pop up with the Main screen Log in: The default login data for the first time is:
 - Username: admin
 - Password: Admin1234
- Select "Settings" menu

It is recommended to click on "Settings" icon first and you may go on to "Monitoring" when you have already added your input source.

In "Source settings" select

- from the 2 options:
- IP Camera •
- Video File

SET UP SOURCES WITH A FEW CLICKS 2.

2.1. IP CAMERA SETTINGS:

Under "Settings", select the "IP Camera" option and type in the URL address of your camera stream. Selecting ARH at "Manufacturer" option, gives more precise camera setup.

Live view is now visible on the screen.

2.2. VIDEO FILE SETTINGS:

- Browse video file from your computer and upload it. .
- You can upload multiple files. •

Click on "Browse" and then select a video file among your files and press "Upload".

3. SET UP ANPR SETTINGS IN A FEW CLICKS

SETUP REGION OF INTEREST (ROI) 4.

Set the ROI by dragging the corner points of the trigger area. •

Adaptive Recognition America Adaptive Recognition Hungary

Adaptive Recognition **Nordic** Adaptive Recognition Singapore

SET UP GENERAL SETTINGS IN A FEW CLICKS 5.

Click on "Settings" button. •

5.1. FTP SERVER (RESULT UPLOAD):

- Here you may enable transferring data to an FTP server. •
- Results are available in JSON format.
- With the Test button, you can test an output, if it is enabled and has been saved.

Fill in all fields, check the "Enable" box and press "Save" to start transfer.

5.2. GDS

- Enable GDS first •
- Carmen GO is capable of real-time • uploading event data to Globessey Data Server.
- The device ID field must be filled in, • otherwise you will not be able to activate the stream in GDS.
- Password is not needed for the upload. •

Fill in all fields, check the "Enable" box and press "Save" to start transfer.

REQUESTINFO@ADAPTIVERECOGNITION.COM

5.3. DATABASE:

- Database status can be set by the user's preferences. •
- If you do not set a database limit, you will run out of storage space. •
- Path, storage limits and database status can be set. .

6. ENJOY CARMEN®GO (MONITORING, BROWSE HISTORY AND DASHBOARD)

6.1. MONITORING:

• With IP Camera(s) connected or Video File(s) loaded, the processing of stream(s) started. "Monitoring" shows detected events. All data is automatically recorded into the internal database.

6.2. DATABASE:

All captured events and recorded data are available for review in this menu. Search by number plate, type, time, stream, make, category and color. You can reload and delete database.

6.3. DASHBOARD:

- The dashboard is collecting data while CARMEN® GO service is running. It has four categories: •
 - Plate types: all detected number plate 0
 - Detection count: show all detected events 0
 - Average detection time: average time of each detection
 - System load: measure of the amount of work that system performs in a 24h period 0
